## **Introduction**

*All things begin as ideas - as thoughts.*

*They reside first in the mind.*

Thoughts can exist in the mind on a conscious or unconscious level. They can be placed in the mind by repetitive experiences or repetitive phrases. For instance, if you repeatedly failed in school or your were repeatedly told by a parent that you would never succeed at something, then this thought may exist in your mind on a subconscious level. You may or may not remember that you were told such a thin. Yet, the thought continually influences you on a subconscious level.

Thoughts can also be placed in the subconscious as a result of experience. If you grew up poor or if your parents struggled in any way financially, then you are likely to have the subconscious thoughts and world view of poverty.

The child's mind is particularly vulnerable to suggestion as they do not have a sufficiently developed consciousness to repel it. And, even in an older person it can be injurious for them to be told over and over again that they will never succeed.

Hypnosis can provide a remedy. It must be applied consistently and persistently in order to overturn the damage.

No exercise of will can effect change on these deeply buried subconscious memories. Only after the program - for this is a mind control program, even if it was not knowingly put in place - has been re-written can a force of will be exerted that can transmute your desire into the monetary equivalent of success.

### **How Do You Feel About Prosperity and Success?**

Do you have a definite goal?

Do you have a definite plan for obtaining prosperity and success?

Do you have barriers to break down before you can even recognize a money making opportunity?

Are you afraid of your bills?

Are you afraid of how you life might change if you succeed?

Are you afraid of what others will expect from you if you succeed?

Do you have old programming that says that rich people are bad, therefore, good people are poor?

Read each of the above questions again and not if you have a strong emotional reaction to any of them.

Feel free to be honest in your emotional reaction; you don't have to share the results with anyone. This information is just for you.

### **The Dangers of Hidden Subconscious Programming**

Even if you have intense desires and a strong will, you cannot succeed with subconscious programming that is contrary to your goal.

The following is excerpted from Napoleon Hill's famous book, "Think and Grow Rich,":

[There is a] "money consciousness" which you must possess, before you can be sure of

accumulating a fortune.

POVERTY is attracted to the one whose mind is favorable to it, as money is attracted to him whose mind has been deliberately prepared to attract it, and through the same laws. POVERTY CONSCIOUSNESS WILL VOLUNTARILY SEIZE THE MIND WHICH IS NOT OCCUPIED WITH THE MONEY CONSCIOUSNESS. A poverty consciousness develops without *conscious* application of habits favorable to it. The money consciousness must be created to order, unless one is born with such a consciousness.

Most people do not have a money consciousness. Most people have a poverty consciousness. Unless your parents were wealthy and even if they were, you probably received a lot of the same messages about prosperity and success. You were given the idea that money is precious and hard to come by.

Maybe you heard:

Money doesn't grow on trees!

We paid good money for those... don't ruin them.

Don't play when you should be working! (This implies that work cannot be fun.)

Slow and steady... easy does it.

Hard work pays off.

Furthermore, if you heard any of this before the age of three years, then it completely by-passed your conscious mind and went straight into your subconscious. Even if your parents weren't speaking directly to you, you could have picked up these ideas and attitudes from them.

If you have not achieved the success and prosperity in your life that you desire, it may well be because of whatever damaging ideas about prosperity or success you may have received in your young life.

Try as you might no force of sheer will can undo this damage. The only way to undo it is to re-write the subconscious mind with the information *you* want it to contain. You want to subconsciously understand that prosperity and success can easily be yours. You can succeed with out a struggle. Making money comes easily and naturally to you.

There are two ways to do this.

The first way is through the persistent application of conscious affirmations that reach the subconscious mind and over time, re-write the program. Many people write affirmations and place them around their home or office where they will see them every day and where, perhaps more importantly, the subconscious mind will register them.

This process can take time, but it will probably deliver rewards in the end.

The second way - the more expeditious way - is through hypnosis.

Specifically, self-hypnosis or what Emile Coué called autosuggestion is an excellent method of inexpensively and effectively ridding ourselves of unwanted thoughts.

You can use pre-recorded audios such as those available from a clinical hypnotherapist, [Steve G. Jones](#) who makes clear, highly professional recordings with his own accent free American voice. He offers audios for immediately download so you can get started re-programming your subconscious mind to succeed right away. [Click here](#) to see a list of his hypnotic recordings.

If you are interested specifically in re-programming your subconscious for wealth, please see Richard

MacKenzie's [Wealth Generating](#) hypnotic recording, which is available for instant download [Click here](#).

Use such hypnotic methods to re-wire your subconscious.

Then you can begin to more quickly implement your goals and make good plans for your future prosperity and success.

Learn to recognize and define exactly what you want

Learn what you must do to achieve that goal.

Then set about making it happen.

Stay relaxed and focused on your goal.

Nurture your desire to reach your end goal.

Do not let anyone stand in your way.

Gravitate toward people who have similar interests and support your dreams.

Shun the company of negative Nellies and dissenters who criticize you - members of this group are often found among friends and family.

### **Overcoming the Fear of Criticism**

The following is excerpted from Napoleon Hill's famous book, "Think and Grow Rich,":

Let us examine some of the symptoms of the Fear of Criticism. The majority of people permit relatives, friends, and the public at large to so influence them that they cannot live their own lives, because they fear criticism.

Huge numbers of people make mistakes in marriage, stand by the bargain, and go through life miserable and unhappy, because they fear criticism which may follow if they correct the mistake. (Anyone who has submitted to this form of fear knows the irreparable damage it does, by destroying ambition, self-reliance, and the desire to achieve).

Millions of people neglect to acquire belated educations, after having left school, because they fear criticism.

Countless numbers of men and women, both young and old, permit relatives to wreck their lives in the name of DUTY, because they fear criticism.

Too many people refuse to set high goals for themselves, or even neglect selecting a career, because they fear the criticism of relatives and "friends" who may say "Don't aim so high, people will think you are crazy."

When Andrew Carnegie suggested that I devote twenty years to the organization of a philosophy of individual achievement my first impulse of thought was fear of what people might say. The suggestion set up a goal for me, far out of proportion to any I had ever conceived. As quick as a flash, my mind began to create alibis and excuses, all of them traceable to the inherent FEAR OF CRITICISM. Something inside of me said, "You can't do it--the job is too big, and requires too much time--what will your relatives think of you?--how will you earn a living?--no one has ever organized a philosophy of success, what right have you to believe you

can do it?--who are you, anyway, to aim so high?--remember your humble birth--what do you know about philosophy--people will think you are crazy--(and they did)--why hasn't some other person done this before now?"

These, and many other questions flashed into my mind, and demanded attention. It seemed as if the whole world had suddenly turned its attention to me with the purpose of ridiculing me into giving up all desire to carry out Mr. Carnegie's suggestion.

I had a fine opportunity, then and there, to kill off ambition before it gained control of me. Later in life, after having analyzed thousands of people, I discovered that MOST IDEAS ARE STILLBORN, AND NEED THE BREATH OF LIFE INJECTED INTO THEM THROUGH DEFINITE PLANS OF IMMEDIATE ACTION. The time to nurse an idea is at the time of its birth. Every minute it lives, gives it a better chance of surviving. The FEAR OF CRITICISM is at the bottom of the destruction of most ideas which never reach the PLANNING and ACTION stage.

Many people believe that material success is the result of favorable "breaks." There is an element of ground for the belief, but those depending entirely upon luck, are nearly always disappointed, because they overlook another important factor which must be present before one can be sure of success. It is the knowledge with which favorable "breaks" can be made to order.

During the depression, W. C. Fields, the comedian, lost all his money, and found himself without income, without a job, and his means of earning a living (vaudeville) no longer existed. Moreover, he was past sixty, when many men consider themselves "old." He was so eager to stage a comeback that he offered to work without pay, in a new field (movies). In addition to his other troubles, he fell and injured his neck. To many that would have been the place to give up and QUIT. But Fields was PERSISTENT. He knew that if he carried on he would get the "breaks" sooner or later, and he did get them, but not by chance. The only "break" anyone can afford to rely upon is a self-made "break."

### **The Steps that Lead to Prosperity and Success**

Napoleon Hill wrote about success at a time when the world had fallen into a state of terrible economic depression. Many say our own present economic circumstances are little different from that time. Yet, it is during such times that some of the greatest fortunes are made.

We cannot allow ourselves to become defeated in our minds. Since the vast majority of our memories are subconscious, it is important to get control of our subconscious minds first.

Once we have re-programmed our subconscious thinking, success will come more easily. But, it will not be automatic.

Applying Hill's Four Steps for Success are essential. He says:

*These four steps are essential for success in all walks of life.*

*These are the steps by which one may control one's economic destiny.*

*They are the steps that lead to freedom and independence of thought.*

*They are the steps that lead to riches, in small or great quantities.*

*They lead the way to power, fame, and worldly recognition.*

*They are the four steps which guarantee favorable "breaks."*

*They are the steps that convert dreams into physical realities.*

Here they are:

1. Have a definite goal fueled by intense desire to see it manifest.
2. Have a definite plan to reach your goal. Take every action continually to work toward its fulfillment.
3. Have a mind that is closed tightly against all negative influences, including the negative suggestions of relatives, friends and acquaintances.
4. A friendly alliance with one or more persons who will encourage you to follow through with your plan and attain your goal.

Using the power of autosuggestion or self-hypnosis combined with these four steps will help eliminate, fear, doubt and discouragement.

Harmful influences can be undone and avoided. Fear can be defeated. Your goals can be more clearly visualized and, thus, more readily obtained. You can become energized toward your goal.

While it is possible to succeed without hypnosis, it is not possible to succeed without neutralizing harmful, counter-productive thoughts.

We must first get control of our minds on both the conscious and subconscious level. We must make our subconscious thoughts work for us instead of against us.
